✚ summary

I'm a hardworking developer, who enjoys finding solutions to complex problems. I'm confident across the stack and specialize in object-oriented CSS, bleeding-edge web technologies, WordPress, and Ruby on Rails. I'm looking for a team that values code quality and fosters an environment where technical debt is dealt with responsibly. My ideal position in one where I focus on crafting responsive and modular design systems, with maintainable CSS and front-end build tools like SASS and Grunt/Gulp.

✚ projects

Lincoln Calling   Mar 2017 – Apr 2017
Client: *Hear Nebraska*. Official website for Lincoln's music festival, with multiple landing pages based on ticket sales and availability. Custom WordPress theme, ACF, object-oriented CSS, SASS, and native JavaScript (no jQuery) for performance. *GitHub*.

Attendance Tracker   Feb 2017 – Mar 2017
Client: *Big Wheel Brigade*. Custom web application built in Ruby with Sinatra for tracking attendance to meetups. Integrates with Meetup.com JSON API, caches upcoming events into Postgres database.

✚ employment

Walmart 8525 S 71st Plaza, Papillion, NE 68133
Associate
Nov 2014 – Nov 2016

✚ skills

TECHNICAL SKILLS
